

## Integrated Infrastructure Solutions

# THE DELCAN PERSPECTIVE

---

## INTEGRATION, INNOVATION AND TECHNOLOGY

At Delcan, we understand the issues facing infrastructure delivery and management:

- Our economy depends on reliable and safe roads, public transportation, bridges, airports, modern freight and port facilities, and clean drinking water.
- The competing demands of our changing society, coupled with greater global competition for resources and economic growth, place enormous pressure on aging infrastructure.
- In recent decades, infrastructure investment has been unable to keep pace with demand, thereby having an impact on all segments of society.
- Deciding on what is built, how it is built, and how it is managed and maintained are being considered increasingly through a perspective of social, economic and environmental sustainability.

Solutions to these challenges will demand greater emphasis on integration, innovations and new technologies.

# COMMITMENT TO CLIENT SERVICE...

We place a priority on understanding our client's needs... and tailoring our services to meet those needs. Our skills have been employed successfully on a wide range of infrastructure projects, many with values in the billions of dollars.

Our services are focused on:

- Highways, Toll Roads, Roads and Bridges
- Passenger Rail and Public Transportation
- Intermodal Freight Operations
- Airports and Aviation
- Ports and Marine
- Water and Wastewater

## ...Results in Client Recognition

Delcan is proud to be the recipient of industry and client awards for both innovation and quality service. The award we are most proud of, however, is when we are re-hired by our clients. More than 85 percent of our current clients fall into this category.

For more details on Delcan's award-winning assignments, visit [www.delcan.com](http://www.delcan.com)

# SOLUTIONS THAT WORK. RESULTS THAT LAST.

Since our inception more than 50 years ago, Delcan has developed some of the industry's most progressive infrastructure solutions.

Our international experience, coupled with a network of global alliances, adds a "world's best" perspective to our service delivery capability.

## OUR KEY SERVICES INCLUDE:

- Strategy and Policy Development
- Planning, Engineering, Design and Architecture
- Program Management
- Quality Management Oversight/ Compliance Audit Services
- Operations Management
- Work Management Systems
- Technology Integration
- Public-Private Partnerships

"Delcan has been both responsive and flexible in refining their approach to meet the specific needs of our program. Their staff are highly professional, and always available when needed. It continues to be a pleasure to work with them."

– Raymond Maybey, P.E.  
OTIA-III Bridge Delivery Unit Manager  
ODOT Office of Project Delivery  
Salem, Oregon

# PIONEERS IN SYSTEMS SOLUTIONS

Delcan is a pioneer and recognized world leader in the development and integration of Intelligent Transportation Systems (ITS) and Intelligent Water Systems (IWS), that involve a full range of Information and Applied Technology services.

"Quality people doing quality work that is delivered on time and on budget. It's no wonder Delcan has won so many awards."

– Darryl P. Shurb, P. Eng.  
Senior Project Manager  
Public Works and Services Department  
City of Ottawa

# INTEGRATED SYSTEMS AND INFRASTRUCTURE SOLUTIONS

Delcan provides a broad range of integrated systems and infrastructure solutions. Our skills and resources are focused on transportation and water sectors reinforced through our information technology expertise.

For more than fifty years, Delcan has consistently evolved and adapted to successfully meet the growing needs of our clients and, as a result, we are now recognized as one of the world's most award-winning companies. Our guiding principle of providing integrated solutions that exceed our clients' expectations continues to motivate our efforts.

Our relationship with the DHV Group of the Netherlands greatly enhances our services. DHV is one of Europe's largest engineering and consultancy firms and their expertise in engineering and technology, water resource management, high-speed rail, tunneling, airports and manufacturing facilities, complements Delcan's own impressive skill set.

The result is a dynamic partnership that better enables both firms to respond to greater challenges around the world, and to offer an even broader range of value-added services to our clients.

Delcan is a growth company – providing services throughout North America and around the world.
